Malta Facilities Management Academy and Consultancy

YOUR FUTURE STARTS HERE

Welcome to Malta Facilities Management Academy and Consultancy (MFMAC), Malta's newest highly recognized academic institution that just launched in 2023.

We are highly specialized in Facilities Management. Our academic objective is to support the facilities industry ranging from residential, commercial, and public buildings through accredited courses at different academic levels

MFMAC is the natural home to leading practitioners, academic experts and technical experts in vast array of disciplines, all converging under Malta's first Facilities Management Academy.

ABOUT US

The world of engineering is a dynamic field. Technology and disruption are constantly present in this industry. With the advent of industry 4.0, education for engineering fields takes on a new dimension. In particular, the management of facilities requires human resources that are both specialised and technical.

MFMAC prides itself in delivering high-quality, applicable knowledge. All trainers have excellent experience within their fields of expertise, as well as an academic background. Trainers encourage interaction by means of activities, teamwork and discussions related to the subject matter from a practical point of view. The training premises are bright and spacious and equipped with advanced facilities to offer a high-quality training environment. A library, study room and lounge area are also available for all participants to be used at their own convenience.

The added value and commitment make MFMAC a unique academy. The world-class degree programmes and specialized training, make the academy a learning hub for all those who would like to improve their creative thoughts, build business facilities skills and stretch their natural abilities to achieve success in their career. We pride ourselves in delivering high-quality, applicable training. Our aim is to always give our students and clients the training they need for their personal or organizational needs

HEAD OF INSTITUTION

Karl Attard has 9 years' experience in this engineering services including designing, commissioning, and tendering, project management, facilities and operation management. He graduated with a Bachelor of Science (Hons) in Building Services Engineering and MBA (University of Chester UK).

Moreover, he has also completed 3 years working experience in Building Services Engineering on an apprentice scheme. During these years he learnt draughting, designing and tendering procedures that are related in Building Services sector. His work experience was mostly based on industrial and commercial buildings. Additionally, he learnt how to calculate and sizing ventilation, air-conditioning systems and electrical systems, fire auditing systems, building services project management, maintenance and commissioning. Currently, he works as a facilities manager in The Centre - Tigne for five years now, taking care of all the building operation and management, related to all M&E's, public areas including customer services and maintenance related to hard and soft services

He worked as a facilities manager at Smart City for four years. He is currently the director of the institute MFMAC, focusing on educational & professional degree courses related to engineering and management . Karl Attard is also partner and director of MAKS Engineering Ltd.

VISION & MISSION

Vision

We fully understand the importance of sustainability, systems and engineering excellence but we also fully believe that the human resource and knowledge is the essential pedament to a solid and rewarding career in facilities management

Mission

Insufficient knowledge in facilities management is affecting the operational cost of every investor. Education is vital to be taken into consideration especially if one considers that facilities management is a long-term and non-stop process where it is not based only on engineering but also on management and innovation.
